TO DO

SSCP-1Register as a student entrepreneur

SSCP-4Set funding goal & duration

IN PROGRESS

SSCP-3Create crowdfunding campaign

IN REVIEW

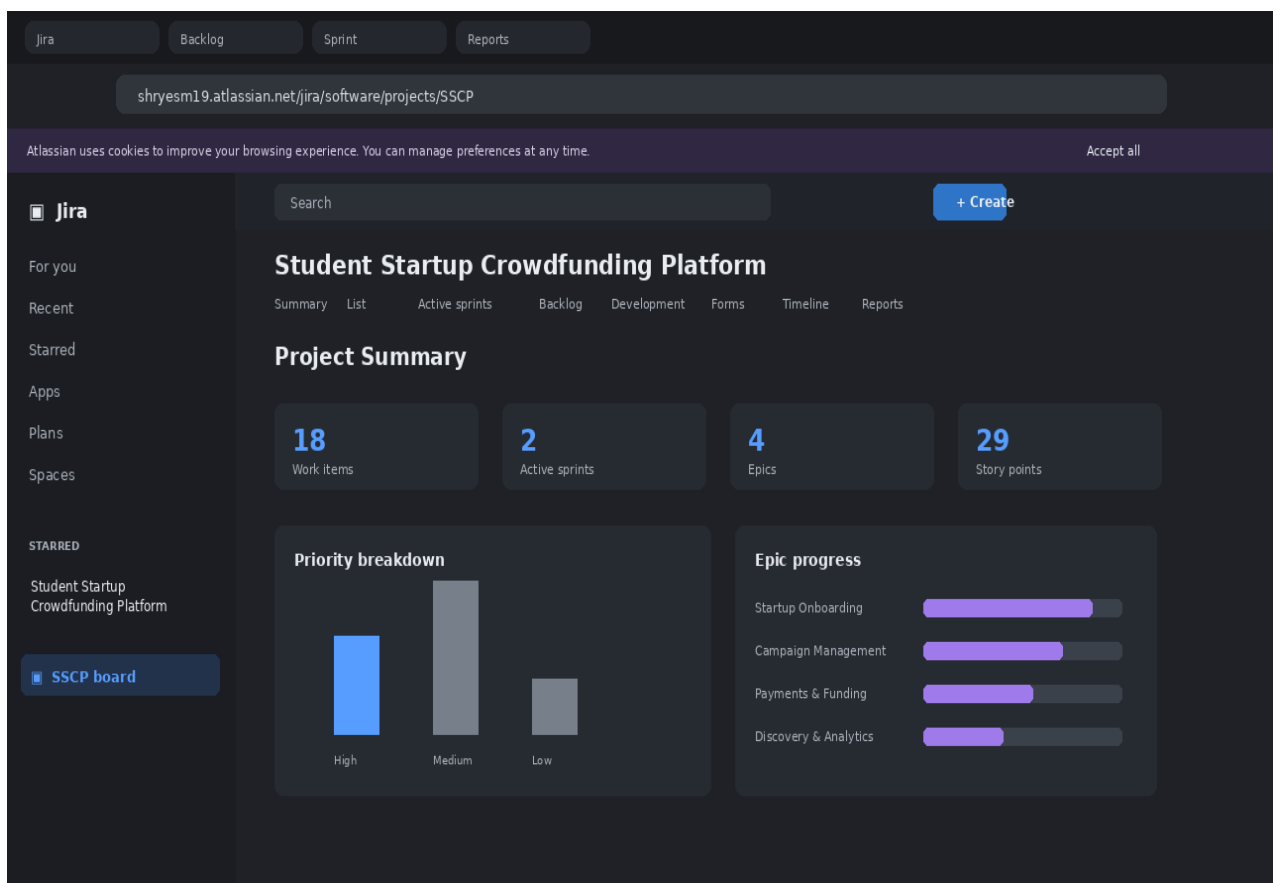

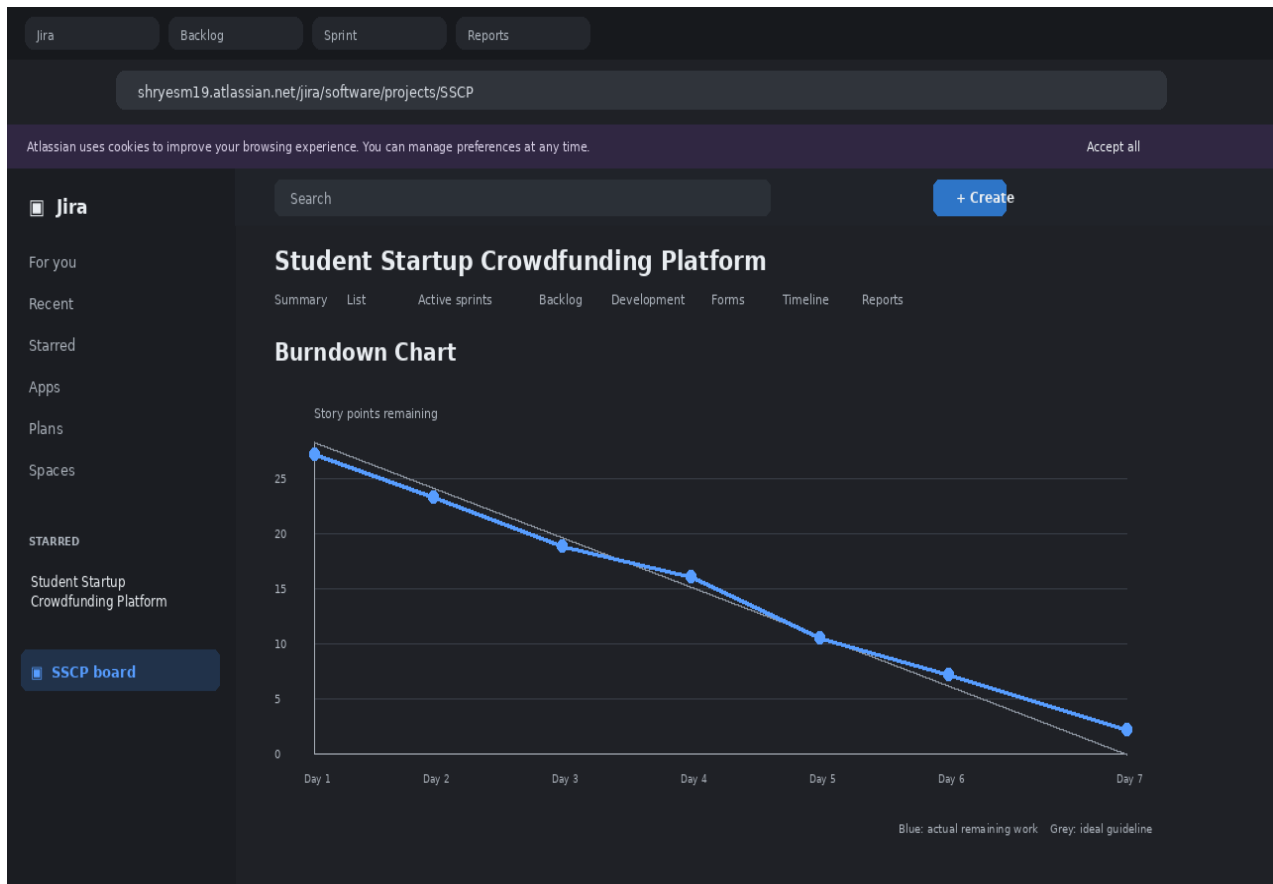

SSCP-5Upload pitch and media

DONE

SSCP-2Create startup profile

SSCP-6Browse student startups

BURNDOWN CHART :

Reflection Questions

1. Did your estimations reflect the actual effort?

Mostly yes. Story points reflected relative complexity, although campaign creation and media upload required more integration effort than simpler profile-related stories.

2. Was your backlog well-prioritized?

Yes. High-value MVP capabilities such as student registration, startup profiles, campaign creation and funding configuration were prioritized before discovery and analytics features.

3. How did your simulated sprint align with your plan?

The sprint followed the planned workflow from To Do to In Progress, In Review and Done. Most foundational stories were completed within the one-week simulation.

4. What insights did the burndown chart give about your team's capacity?

The chart showed a steady reduction in remaining story points. The team was able to complete the selected work at a sustainable pace, with slightly faster progress toward the end of the sprint.
